

Bright Star Academy Phone Tree Emergency Notification System

The Phone Tree (called One Call Now) is an automated messaging system that allows us to communicate to families reminders of holiday closings, special events, early closings due to inclement weather and other emergency situations that may arise. We simply record a message and it automatically sends the message to all phone numbers we have in the system.

Please indicate below 2 contact numbers and 2 email addresses you wish for us to call. Please make sure that these phone numbers are a direct line.

If any of the numbers or email addresses change in the future, it is very important that a new form be completed in order for us to update numbers in our system.
